INTRODUCTION

I2SM is the International Symposium on Sediment Management lunched in 2008 in the city of Lille, France, with the aim of gathering researchers, industrials and engineers around the trans-disciplinary problems of sediment managements. The last edition was organized in Mexico in 2018.

After 12 years of success (Morocco in 2010, India in 2012, Italy in 2014, Canada in 2016, and Mexico in 2018), Lille will be again the host city for I2SM. To celebrate this event you are all welcome to participate at this special edition.

At this occasion several cultural activities will be proposed in order to discover this wonderful region in the North of France.

MAIN TOPICS

- Sustainable sediment management
- Environmental impacts and regulation
- Beneficial reuse and valorization
- Sediment and water
- Dredging, treatments and remediation
- Characterization and monitoring
- Management and decision-analysis tools
- Green construction and circular economy

CONFERENCE FEES

Participants	Early bird registration	Late bird registration
Industrials	800 €	850 €
Researchers	500 €	550 €
Students	300 €	350 €
Gala dinner	50€	

ATTRACTION LILLE

Discover the diversity of Lille's heritage: the "Palais des Beaux-Arts", the 2nd most important museum in France. The belfry of town hall, a UNESCO World Heritage site. The "Notre-Dame de la Treille" cathedral, the Louvre Lens museum and more.

In 2020, Lille Métropole will be the first French metropolis to become the World Capital of Design thanks to an innovative project: transforming its territory through design.

On the program: exhibitions, events, theme tours, meetings with designers, not forgetting many festive, urban, educational events.

Your stay at Lille will be a great opportunity to discover the famous local restaurants "Estaminet" that will offer you regional cuisine :Welsh, Maroilles ... And do not forget the French pastry!
