

Stability of shallow soil slope under rainfall infiltration

Short BIO:

Lec. Dr. Zhenning SHI

Dr. SHI has been a lecture in Changsha University of Science & Technology, School of Traffic & Transportation Engineering since 2018. He is also a member of National Engineering Research Center for Highway Maintenance Technology. He is currently studying at LGCgE for one year as a visiting scholar.

E-mail: shizhenning@126.com;

szn@csust.edu.cn

He received his Ph.D. in Changsha University of Science & Technology in 2018. His research interests cover two main directions: stability analysis of cutting slope along the road under the influence of rainfall, and the deformation of road embankment in complex environments. The research mentioned above are both aimed at keeping a long service life of the road.
